

Creating A Holiday Safety Plan

- Never buy a dry Christmas tree.
- Make sure the tree has plenty of water and is not placed too close to a fireplace, heater, or anything that gives off sparks.
- Recycle your tree before it becomes brittle or before January 1.
- Never burn the tree or gift wrapping paper in a fireplace.
- Check Christmas lights before you use them. Never use lights that have a frayed cord or missing bulbs.
- Turn off all Christmas lights and extinguish candles before going to bed or leaving the house.
- Place a screen around your fireplace when it's in use.
- Know how to call 9-1-1 or your local seven-digit emergency number.
