## Slauson Avenue Corridor Improvements

### WHAT IS THE PROJECT?

Traffic safety and connectivity improvements on Slauson between I-5 and I-710!

### PROJECT GOALS

#### Efficiency

*Increase the capacity efficiency of Slauson Avenue and reduce congestion along the corridor.*

#### Mobility

*Improve the overall mobility for all road users and all modes of transportation along Slauson Avenue.*

#### Connectivity

*Provide greater access to major trip generators and transportation facilities in Commerce.*

#### Safety

*Improve the safety of all motorists, bicyclists, and pedestrians along Slauson Avenue.*

### HOW WILL THE PROJECT ACCOMPLISH THE GOALS?

The project aims to enhance traffic safety and connectivity by incorporating street pavement and pavement markings, new raised medians and/or modified existing medians, protected or protected/permissive left turn lanes at some of the signalized intersections, improved street lighting, and enhanced bus stops with bus shelters, benches, trashcans, where applicable. Other improvements include bike facilities and the incorporation of water quality treatment throughout the Corridor to comply with NPDES requirements.

### TIMELINE

**APRIL/MAY 2023**

Preliminary Engineering

**AUGUST 2023**

Final Engineering

**AUGUST 2024**

Construction Support
